

Validated periodic Rayleigh-Evans branch certificate

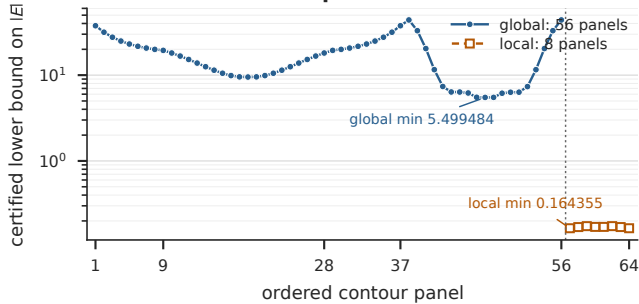

$0 \leq d \leq 1/450$; interval lower bounds and exact base windings

A Spectral-domain geometry

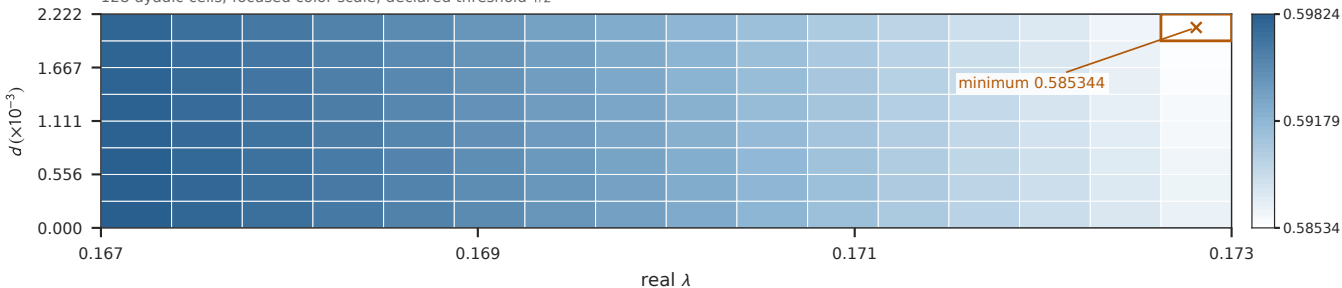

B Uniform contour-panel bounds

C Kinetic left-right overlap lower bounds

128 dyadic cells; focused color scale; declared threshold $1/2$

Scope: one planar periodic linearized certificate; no viscous, 3D, finite-time-singularity, or Clay conclusion.
