

# One-sided ball completion exposes the remaining I1 debt

R0.74S analytic route | ABSTRACT NO-GO, NOT PDE/NSE | NOT CLAY

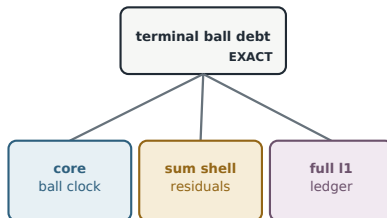

## A One-sided ball clocks

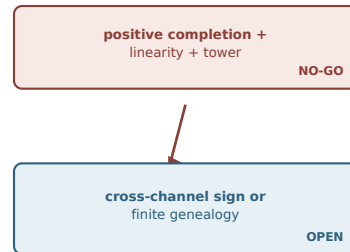

All quadratic cutoff rows remain paid by  $A_R = (P_R^M)^{(2/3)}$ .

## B Exact Abel identity

Abstract smooth tower: debt = N while matched square function is only  $\sqrt{N}$ .

## C Decision boundary

**PROVED ABSTRACT NO-GO only.**

No velocity, pressure, or PDE realization is asserted.

**NOT PDE/NSE. NOT CLAY.**
