

A law-level repair and path split

B exact R-power payment ledger

Good paths

packet	B^{-1}	K_T	$\int H_R du$	slice	total
+6	+2	-1	-3	+1	+5

$$R^6 \times R^2 \times R^{-1} \times R^{-3} \times (LR) = LR^5$$

Bad paths

packet	K_T	$\int H_R du$	time	P(bad)	total
+6	-1	-3	+2	+1	+5

$$L \times R^6 \times R^{-1} \times R^{-3} \times R^2 \times R = LR^5$$
