

R0.71N / full scalar, square cancellation, and the signed second jet

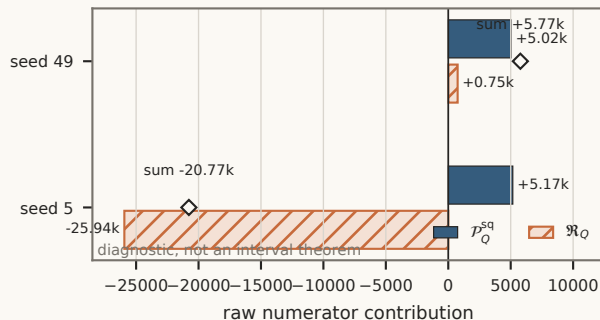

Exact fixed-cell algebra - deterministic initial-jet diagnostics - critical co-scaling - no DNS

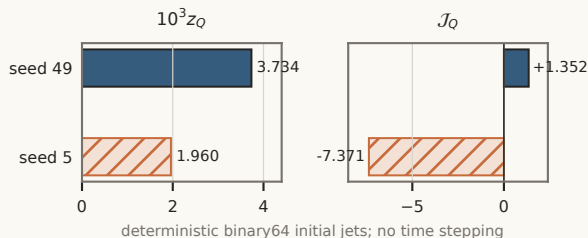

A Complete scalar: exact cancellation route

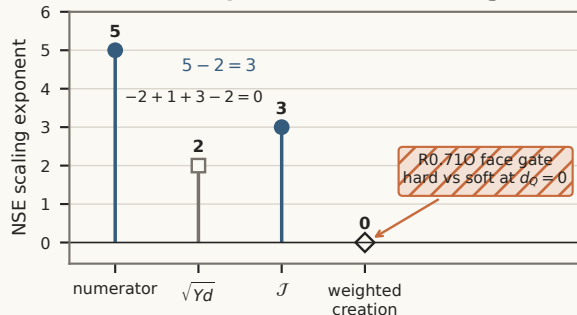

B Initial-jet numerator components

C Positive z, opposite signs of J

D Critical exponents; R0.710 face gate

Scope: fixed χ_Q and $Y, d_Q > 0$. Witness signs are diagnostic, not interval theorems. No no-go, continuation, regularity, or singularity claim.
